

DO ENGLISH WITH BRIAN

June — Three Conversations IV

Success, Redefined

Your Definition · A Kinder Philosophy · Success in Academia

Three questions. No right answers — just your thoughts, in English.

“If you stripped away everyone else's opinion, what would success actually mean to you?”

남들 시선을 다 걷어내면, 나에게 성공은 정말 무엇일까?

IF THE TALK SLOWS DOWN — DIG DEEPER

- Whose definition of success have you been living by — yours, or one you inherited?
- Has your definition changed from your twenties to now? What moved it?
- Can you be successful and unhappy at the same time — or does that cancel out?
- If you reached every goal on your list tomorrow, would you feel “successful” — or just relieved?

TOOLS — 막힐 때 잡는 표현

to me, success looks like ~ (나에게 성공은 ~처럼 보인다) **deep down, what I really want is ~** (마음 깊은 곳에서 원하는 건 ~) **I used to think ~, but now ~** (예전엔 ~라 생각했는데, 지금은 ~) **on my own terms** (내 방식대로) **it's not about ~, it's about ~** (~의 문제가 아니라 ~의 문제다)

“We can't be successful at everything — so what are you willing to fail at?”

모든 것에서 성공할 순 없다 — 그렇다면 무엇에서는 기꺼이 실패할 것인가?

IF THE TALK SLOWS DOWN — DIG DEEPER

- De Botton says every idea of success carries a hidden loss. What does yours cost you?
- We admire “self-made” people — but how much of success is really luck we don't admit?
- Is it braver to chase a big goal, or to consciously let one go?
- If a friend “failed” by society's standards but lived happily, would you call them successful?

TOOLS — 막힐 때 잡는 표현

I'm willing to fall short on ~ (~에서는 기꺼이 부족해도 된다) **there's a trade-off between ~ and ~** (~와 ~ 사이엔 맞교환이 있다) **at the expense of ~** (~을 희생하면서) **come to terms with ~** (~을 받아들이다) **by that measure** (그 기준으로 보면)

“In research, who gets to decide your work was a success — and do you agree with them?”

연구에서 내 성과가 성공인지 누가 정하는가 — 그리고 나는 그에 동의하는가?

IF THE TALK SLOWS DOWN — DIG DEEPER

- Citations, journals, funding — do these measure real impact, or just visibility?
- Have you ever done work you were proud of that the field ignored? How did you hold both?
- If one paper helped one clinician treat one patient better, is that success — even unpublished?
- Ten years from now, what would make you say your research life was worth it?

TOOLS — 막힐 때 잡는 표현

what really counts is ~ (정말 중요한 건 ~) **measured by ~** (~로 측정되는) **I'd rather ~ than ~** (~하느니 차라리 ~하겠다) **make a real difference** (진짜 변화를 만든다) **looking back, I want to say ~** (돌이켜봤을 때 ~라 말하고 싶다)
