June — The Meaning of Pain

Your Pain · Can Pain Be Shared? · The Expert's Dilemma

Three questions, face to face. No right answers — just your thoughts, in English.

“What is your relationship with pain?”

당신과 통증은 어떤 사이인가요?

IF THE TALK SLOWS DOWN — DIG DEEPER

- Point to one — an old injury, a stiff neck. “Right here, when I do this.” Show it, don't just tell it.
- The most memorable pain of your life — how did you treat it? Push through, or stop everything?
- Has pain ever done you a favor — a warning you're glad you got? And one you regret ignoring?
- Where did you learn your attitude to pain — family, sports, or your profession?

TOOLS — 막힐 때 잡는 표현

a dull ache (둔한 통증) **it flares up when ~** (~하면 도지다) **push through** (참고 버티다) **it comes and goes** (왔다 갔다 하다) **I didn't think much of it** (대수롭지 않게 여겼다)

“You can point to your pain — but can I ever really know it?”

통증은 가리킬 수 있지만 — 내가 당신의 통증을 정말 알 수 있을까요?

IF THE TALK SLOWS DOWN — DIG DEEPER

- The 1-to-10 scale you use every day — is my seven your seven? What is that number actually measuring?
- Sharp, dull, burning, stabbing — every pain word is a metaphor. Can pain be described without one?
- “I know how you feel” — is that sentence ever true? How far can empathy actually reach?
- Babies, animals, patients who can't speak — how do we know their pain at all?

TOOLS — 막힐 때 잡는 표현

words fall short (말로는 부족하다) **I can only imagine** (짐작만 할 뿐이다) **at best** (잘해야, 기껏해야) **strictly speaking** (엄밀히 말하면)
put ~ into words (~을 말로 옮기다)

“It hurts — but I’m playing next week.” What do you say?

“아픈데, 다음 주 경기 뛴 거예요.” — 전문가인 당신은 뭐라고 하나요?

IF THE TALK SLOWS DOWN — DIG DEEPER

- Play it out, face to face: Brian is the athlete. Check the ankle for real — “Does it hurt when I press here?”
- How far does an expert's right to say no go? Where does advice end and control begin?
- The data says rest; the athlete says “I’m fine.” Whose word wins — and why?
- Have you lived a moment like this — in the clinic or in your research? What did you do?

TOOLS — 막힐 때 잡는 표현

from a clinical standpoint (임상적 관점에서) **weigh ~ against ~** (~와 ~을 저울질하다) **I can't in good conscience ~** (양심상 ~할 수는 없다) **the worst that could happen** (일어날 수 있는 최악) **it's ultimately your call** (결국 당신의 결정입니다)
