

JUNE • Q&A CLASS 7

The Talk, Slide by Slide

The paper is moving. Now build the ten minutes you'll stand up and say.

WARM-UP

Where the Paper Sits

QUESTIONS

Q1 How's the week been?

Q2 Where's the paper now — what's left?

Q3 What's been the hardest part to write?

WHERE IT STANDS · 지금 상태

- I'm still working on ~
- The part that's taking longest is ~
- It's basically done except ~
- Once ~ is settled, I can ~

WHAT'S BEEN HARD · 어려웠던 것

- I've been going back and forth on ~
- I keep rewriting ~
- The tricky part is saying ~ without ~
- I know what I mean — I just can't ~

The First Thirty Seconds

QUESTIONS

- Q1 Why should this room care about ankles?
- Q2 How do you make them care in the first thirty seconds?
- Q3 Who's sitting out there — clinicians, researchers, or both?

OPENING LINES • 첫마디

- Every year, ~ people ~
- If you've ever ~, you know ~
- Most of us assume ~ — but ~
- Let me start with a number: ~
- Ankle sprains are ~, and yet ~

FRAMING THE TALK • 이 발표가 뭔지 말하기

- The question we started with was simple: ~
- What we still don't know is ~
- This talk is about ~
- By the end of this, I hope you'll ~
- Here's the problem in one sentence: ~

Why Nobody Had Done This

QUESTIONS

- Q1 Everyone knew CAI patients are weak in both the foot and the trunk. So what was missing?
- Q2 How do you say “nobody compared them” so it sounds like an opportunity, not a complaint?
- Q3 Why did nobody do it — was it hard, or just unasked?

WHAT WE KNEW • 다들 아는 것

- Previous work has shown ~
- We've known for years that ~
- The two have been studied separately, but never ~
- It's not that no one cared — it's that ~

WHAT WAS OPEN • 아직 아무도 안 한 것

- What hasn't been looked at is ~
- That leaves clinicians guessing about ~
- There's an open question here: ~
- This is where our study comes in
- We saw an opportunity to ~
- So we set out to ~

Twenty-One People, Three Groups

QUESTIONS

- Q1** Why twenty-one? Someone will ask.
- Q2** Why did you need a control group at all?
- Q3** Why eight weeks — why not four, why not twelve?
- Q4** What would you change if you ran it again?

EXPLAINING IT • 설명할 때

- We recruited ~ and assigned them to ~
- Group one did ~, group two did ~, and the control group ~
- We chose ~ weeks because ~
- We measured ~ at baseline and again at ~
- We kept it simple on purpose, because ~

DEFENDING IT • 질문 받았을 때

- The sample size was driven by ~
- We needed a control group to rule out ~
- That's a fair limitation — ~
- The design was constrained by ~
- If I ran it again, I'd ~

Both Improved. Now What?

QUESTIONS

- Q1** Both groups improved. How do you say foot core is better without overselling it?
- Q2** “Earlier improvement” — earlier by how much, and does that matter clinically?
- Q3** What's the one number you want them to remember?

SAYING THE RESULT • 결과를 말할 때

- Both groups improved, but ~
- The difference showed up at ~
- The gap was clearest in ~
- The direction was consistent across ~
- If I had to pick one number, it's ~
- Clinically, that means ~

STAYING HONEST • 과하게 말하지 않기

- It's a small sample, so ~
- I'd be careful reading too much into ~
- We're not claiming ~ — what we can say is ~
- What surprised us was ~

The Last Sentence

QUESTIONS

- Q1** What should a clinician do differently after hearing your talk?
- Q2** What's your last sentence — the one they carry out of the room?
- Q3** Someone stands up and says “this is too small to matter.” What do you say?

WHAT IT MEANS · 현장에선 뭐가 달라지나

- What this means in practice is ~
- If you're treating CAI patients, ~
- We'd suggest starting with ~
- That's not to say ~ doesn't matter — ~
- The next step would be ~

CLOSING & PUSHBACK · 마무리와 되받기

- To close — ~
- If you take one thing from this talk, ~
- That's a fair point, and it's exactly why ~
- Small, yes — but the effect was ~
- I'd rather report a small honest result than ~
- Happy to take questions
