SANGHYUN · CLASS 2

Sixty Seconds Each

Fourteen days to November 25. Today: three final versions, five new answers.

THE SEVEN MINUTES

How It Goes

From the interview notes you brought — nothing else.

1 : 1

One interviewer, you. About five to seven minutes.

4 – 5

Questions. Short answers, not speeches.

Start

Your self-introduction — then follow-ups come from what you said.

Tone

Friendly, conversational. Not an exam.

Your self-introduction decides the next questions.

자기소개가 다음 질문을 정해요 .

오늘은 1–3 번 완성본을 확인하고 , 4–8 번 첫 답을 만들어요 .

QUESTION 01 · 자기소개 · 60초 안에

Tell me about yourself.

What you said last time, and the version we keep. · 지난번에 한 말과 , 가져갈 완성본 .

WHAT YOU SAID · 1회차에 나온 대로

Active and friendly person. I always work out before when I'm going to work. After work I am trying to some of my friends to hang out someday. Nowadays I am studying some related to KAC. I'm working at the government facility and it is facility which is treat some all kind of trash. So it sometimes dangerous so trying to do my best.

6:30am wake up -> gym & tennis -> 9am -> dinner with friends / tennis -> drink alone at home

5 years ago, when I joined the facility for the first time, there are problems with some main facility. So I had to fix it 2 times a week. It was keep happening and no one wants to fix it. Environment of the facility was very dangerous and too high temperature. So it was always main problem in my facility. So I have to fix it or I have to change it to fix the problem. I took time and contact with some facility companies and try to find a solution for this problem. And I found a global company that they can fix this problem. So I adopted their service and change the newly built it system.

SAY IT AGAIN · 완성본

Hello, I'm Sanghyun Shin. I've spent five years maintaining mechanical facilities at a public waste-treatment plant that runs 24 hours a day. In a place like that, one small problem can turn into a big one, so my job is to find it early. The work I'm most proud of is replacing our SCR system. It used to break down five or six times a month, and now it's under two. Before this job, I interned at Incheon Airport, and I've wanted to work at an airport ever since. Outside work, I start most days at the gym or on the tennis court.

BRIAN FOLLOWED UP · 꼬리 질문

"How long exactly — and where?"

For 5 years. My duty is maintaining mechanical facilities like AC, boiler room, etc.

One problem can cause bigger issue. It is very important find some problems.

WHAT CHANGED, AND WHY

- New order: job → one result → airport → you. The SCR story took the whole minute.
- SCR is one sentence with numbers. The details go in Question 3.
- Past tense for past events: there are → there were / it was keep happening → it kept happening

QUESTION 02 · 지원 동기 · 자소서 1 번

Why Korea Airports Corporation?

What you said last time, and the version we keep. · 지난번에 한 말과 , 가져갈 완성본 .

WHAT YOU SAID · 1 회차에 나온 대로

Actually I have experience working at the airport. It was almost 6 years ago. I ran some facility at the airport and it was fascinating. Since at that time, I am trying to go work at the airport but at that time, it was covid and airlines were not hiring. At that time, I changed my mind as I need some experience managing some facilities so I am working at the another facility. Until now, I am eager to work at the airport so that is the reason why I want to work at KAC. Intern at Incheon airport as development of MRO. (항공정비단지)

SAY IT AGAIN · 완성본

Six years ago, I interned at Incheon Airport on the MRO development team, and I was fascinated. I wanted to stay in aviation, but COVID hit and no one was hiring. So I decided to build real experience in facility management first, and now I have five years of it. KAC runs fourteen airports, so I can learn in many different environments. An airport is core national infrastructure, and I believe my industrial engineering degree and my maintenance experience can be useful there.

BRIAN FOLLOWED UP · 꼬리 질문

“Why not stay where you are?”

I think airport is not a simple transportation but it is main infra of Korea. It combines with logistics, airport and other things. It is very complicated but sophisticated location. As my major is industrial engineering, so my experience with mechanical facility management and industrial engineering can be helpful.

Applied for IIAC (be honest). There are two majors airport corporation in Korea and KAC 14 airports in Korea so I can learn various environment and important things for me. I always want to learn new things and that is why I want to be at KAC.

WHAT CHANGED, AND WHY

- Time order: intern → COVID → experience → now. "At that time" came up three times.
- "I am eager to work" → your real reason: fourteen airports, different environments.
- Your major moved into the last sentence. It was in your follow-up answer.

QUESTION 03 · 프로젝트 · 자소서 1·4 번

Tell me about a project you did.

What you said last time, and the version we keep. · 지난번에 한 말과 , 가져갈 완성본 .

WHAT YOU SAID · 1 회차에 나온 대로

My project that I did was the change some facility it was SCR facility which it is one of the main equipment in the facility. Also it has many problems. So no one wants to fix and change because it is very difficult to change and hard to fix it. I tried to fix it because I had to deal with this problem always. I reached out some new global companies. It was GEA and I tried to contact with them. Because GEA is mostly adopted in food production as our is not in food production industry. So it is different condition. I have to handle this issue. So I went to Denmark. So I could adopt this equipment at my facility. In conclusion, I could reduce the problem under 2 per a month from 5~6 times as month.

SAY IT AGAIN · 완성본

Our SCR system was breaking down five or six times a month, and no one wanted to touch it, because repairing it is hot and dangerous. I was the one fixing it every time, so I looked for a real solution. I found GEA, a global company. Their equipment is mostly used in food production, so I had to check whether it would work in our conditions, and I went to Denmark to see it myself. The hardest part was convincing my company and the city, because the city supports our budget. I focused on two things. First was the reliability. Given our facility runs 24/7, reliability was the most important. And the efficiency is the most weakness part on our SCR system. Second was the safety. To fix our SCR system, we had to work at the dangerous environment. And it could be harm to workers. Now the safety is the most important thing in government system. With these two points, I managed to convince my company and the city. After the replacement, breakdowns dropped to under two a month.

BRIAN FOLLOWED UP · 꼬리 질문

“What was the hardest part?”

The hardest part of this project was to convince my company and I had to convince the city as they assist the budget. 2nd is as I had to adopt the new system. As I had to adjust the equipment.

WHAT CHANGED, AND WHY

- Numbers in the first sentence. The interviewer sees the size of the problem right away.
- Added why no one wanted to fix it: hot and dangerous. Your words from Question 1.
- Convincing the company and the city moved into the answer. It was your strongest point.

QUESTION 04 · 뽑아야 하는 이유

Why should we hire you?

You answer. Brian types. Then say it again, a little better.

HINT WORDS

- fixed what no one wanted to fix
- five years, hands-on
- found GEA myself
- convinced the city

WHAT YOU SAID · 처음 나온 대로

I have two strengths points. First one is I have an experience maintaining many equipment and facilities at government. Which can be help at the airport. Because airport has many facilities and equipment. I already have an experience and knowledge on how to deal with these equipment. Second is I have a strength in focus on total syttem and the efficiency. Because I studied industrial engeering at college, at that time I learned how to maximize the total system efficiency. This knowledge is fit to the airport. Because airport is not just a mechincal facility. It is total related to mechanical and electroical and other things. To have a view to be able to look at total process of the system. Based on these two strengths, you should be consider me as a strong candidate for this position.

BRIAN FOLLOWS UP 꼬리 질문

“What can't you do yet?”

5 years ago, I have no experience of working at maintaining facility. I was not good at mecnical knowledge compare to others. At that time, I had to earn my experience like airport, plant. This facility is very complicated and difficult to deal with. At that time, my father was sick due to a cancer. Because of COVID, only one person could visit him. I needed to stay near him.

SAY IT AGAIN · 고친 버전

WHAT CHANGED, AND WHY

QUESTION 05 · 강점 · 약점

Your strengths and weaknesses?

You answer. Brian types. Then say it again, a little better.

HINT WORDS

- find problems early
- don't give up on hard ones
- only mechanical so far
- studying for KAC now

WHAT YOU SAID · 처음 나온 대로

My strength points are problem solving. As I explained, I have an experience to solving problem. I dropped the error rate from 8 per month to 2 per month. And I am good with people and people always say to me that you are very good to work with. And this is my strength points. I think a weakness that I have no experience other jobs. I only worked at one department so my focus is basically on mechanical problem but airport is total system and there are a lot of department so I have to expand my view points on various area. Sometimes I am nervous due to stress. I want to be best at many things. Sometimes it is not that well as I think. Sometimes before project or competition of tennis, I feel nervous about it. Maybe that is the weakness point of myself.

BRIAN FOLLOWS UP 꼬리 질문

"How are you working on it?"

I think I have to calm down and relief my stress. I usually go to sauna. And rest in sauna. That can be helpful for me to get a sleep.

SAY IT AGAIN · 고친 버전

WHAT CHANGED, AND WHY

QUESTION 06 · 도전 경험

A challenge you remember?

You answer. Brian types. Then say it again, a little better.

HINT WORDS

- equipment made for food production
- different conditions
- Denmark
- adjusting it on site

WHAT YOU SAID · 처음 나온 대로

I think the most challenge time was this year's tennis competition. I have been eager to win the competition. But it is not easy. At this competition, there is no restrictions of how long they played tennis. Compared to others, I played tennis shorter so I have to practice more. But in the sports, it is difficult to get better in short period of time. My goal is to win this competition. Everyday before I go to work, I took the tennis lesson and I spent time my time to fix my swings. It is my weakness. Actually I couldn't win this competition but I managed to finish in 3rd.

BRIAN FOLLOWS UP 꼬리 질문

"What did you learn?"

I learned two things. I can improve my weakness. Before the competition, I always solve my serve skill. Because that was my weakness. At that competition, I didn't do any double faults. 2nd thing is mindset. I always held up on the point that I lost. And decided to focus on the game and at that moment.

WHAT CHANGED, AND WHY

QUESTION 07 · 협업

Tell me about working with others.

You answer. Brian types. Then say it again, a little better.

HINT WORDS

my team | the city office | GEA engineers | different opinions

WHAT YOU SAID · 처음 나온 대로

TO maintaining our facility, everyday I have to check aspects of the facility. Also I have to communicate with the electric part and communication part and other parts. Sometimes I have to communicate with counsel. There are a lot of companies so I have to communicate with them. I have also experience made a team to go on tennis competition. There are sometimes team competition at tennis and this team made with six people. At that time, they didn't know each other. I was only one knows everyone. So I had to mange schedule in between. And to ensure we play as a team.
