

DO ENGLISH WITH BRIAN

Ho-jun — Class 4

Watch → Learn → Watch Again · Korean Waters

Warm-up · First Watch · Vocab & Expressions · Second Watch · DRA Round 3

Catching Up

가볍게 근황부터 — 그리고 오늘은 좀 다르게 갑니다. 먼저 "그냥" 영상을 봅니다.

1

How was your week? Anything new on the Wando project?

완도 프로젝트 근황 — 지난 표현 재활용

2

Did you know your Wando area is in an international webinar?

완도~제주 해역이 오늘 영상에 나옵니다 — 내 현장이 교재!

3

How do Korean water depths change from west to east?

서해는 얇고 동해는 깊다 — 오늘 리스닝의 핵심 예고

Just Watch — No Notes Yet

먼저 아무 정보 없이 영상을 봅니다. 다 알아들으려 하지 마세요 — 아는 단어 몇 개만 잡아도 성공. 실전(8월 화상회의)이 딱 이렇습니다.

WATCH · Geotechnical Design — Korean Waters (2:44 – 5:41)

영국 기관 웨비나 · Water depths (2:44) → Ground conditions, Site A & B (4:05). Site B가 바로 완도~제주 해역!

youtube.com/watch?v=KE57r9eTRy0

After first watch — 편하게 이야기해요: ① 무슨 주제였던 것 같아요? ② 들린 단어 몇 개만 말해볼까요? ③ 어디가 제일 안 들렸어요? (여기를 오늘 공부합니다)

TIP · This is the "how much don't I catch?" moment

안 들리는 게 정상이에요 — 그걸 확인하는 게 First Watch의 목적입니다. 다음 단계에서 단어·표현을 배우고, 다시 보면 확 들립니다.

열기:

Today's Vocab #31-40

GROUP 1 · Water Depth & Project Status (2:44-4:01)

31 water depth 수심

"There's a wide range of water depth."

32 commissioned 준공된, 가동에 들어간

"These farms are fully commissioned."

33 pre-construction / consenting 사전 건설 / 인허가 단계

"...either in pre-construction or consenting."

34 foundation selection 기초 형식 선정

"...what that means for foundation selection."

35 ground conditions 지반 조건

"Going on to talk about ground conditions..."

GROUP 2 · Ground Conditions (4:05-5:41)

36 marine sand 해사 (바다 모래층)

"...a thin layer of marine sand."

37 clay / silt 점토 / 실트

"...low to medium strength clays and silts."

38 normally consolidated 정규압밀된 (지반 상태)

"...which are normally consolidated."

39 bedrock 기반암

"Underlying that is bedrock."

40 granitic / volcanic rock 화강암질 / 화산암

"...granitic in origin... hard volcanic rocks."

Today's Expressions (1/2)

발표 표현 · Setting Up & Water Depths (2:44–4:34)

1 starting the main body of the presentation [2:44] 본론으로 들어가서

"...starting the main body of the presentation."

2 we'll start by looking at ~ [2:51] 먼저 ~부터 살펴보겠습니다

"We'll start by looking at water depths."

3 I've taken this image from ~ [2:55] 이 이미지는 ~에서 가져온 것입니다

"I've taken this image from the 4C Offshore website."

4 as you can see, ~ [3:19] 보시다시피 ~

"As you can see, they are spread along the coast."

5 I'll illustrate that by ~ing [4:05] ~함으로써 설명드리겠습니다

"I'll illustrate that by talking about four sites."

6 the ground conditions comprise ~ [4:34] 지반은 ~로 구성되어 있습니다

"The ground conditions comprise a thin layer of sand."

Today's Expressions (2/2)

발표 표현 · Ground Conditions, Site A & B (4:38–5:41)

7 ~ is underlain by ~ [4:38] ~ 아래에 ~가 있습니다

"...marine sand which is underlain by clays."

8 ~ in origin [4:55] 기원이 ~인, ~에서 생성된

"...bedrock which is granitic in origin."

9 moving around to Site B, ~ [4:59] Site B로 넘어가면 ~

"Moving around to Site B, which lies between Wando and Jeju."

10 of the order of ~ [5:12] 대략 ~ 정도

"The water depth is of the order of less than 50 meters."

11 as you go towards ~, it gets deeper [5:18] ~쪽으로 갈수록 깊어집니다

"...gets deeper up to 135 meters as you go towards Jeju."

✓ ✓
12 which is a particular condition in that area [5:41] 그 지역 특유의 조건입니다

"...hard volcanic rocks — a particular condition in that area."

Watch Again — Now You're Ready

이제 단어·표현을 배웠으니 같은 영상을 다시 봅니다. 세 파트로 나눠서, 각 파트의 질문에 답을 찾아보세요. 아까보다 훨씬 잘 들릴 거예요!

PART A · Water Depths (2:44 – 4:01)

Listen for: ① 등록된 발전소가 몇 개? ② 수심 60m 이상이 몇 %? ③ 그게 무엇(foundation ~)과 연결되나?

정답: ① 74개 ② 25% ③ foundation selection (기초 선정)

정답: ① 기초는 어떻게 바다에 세우나? ② pile driving 소음은 어떻게 줄이나? ③ 터빈 부품은 어떤 순서로 조립되나?

PART B · Site A — Yellow Sea (4:20 – 4:59)

Listen for: ① 수심은? ② 지반 구성 순서는? (sand → ? → ?) ③ bedrock은 무슨 암석, 몇 m?

PART C · Site B — Wando to Jeju (5:06–5:41): 완도 근처 50m 미만 → 제주 쪽 135m로 깊어짐 · 제주 쪽 해저에 hard volcanic rock (내 현장!)

Listen for: ① 10–20m ② marine sand → clay/silt → bedrock ③ granitic, 40–50m

Now Describe Your Own Site

오늘 배운 표현으로 완도금일 프로젝트를 직접 설명해봅니다. 빈칸(~)은 호준님이 아는 실제 값을 넣어 말하세요.

Summarize the video

"The video looked at Korean water depths and ground conditions at four sites."

Water depth

"In our Wando project, the water depth is of the order of ~ meters."

Ground conditions

"The ground conditions comprise ~, underlain by ~. The bedrock is ~ in origin."

Connect to the video

"The video's Site B is near our area — towards Jeju they mentioned volcanic rock."

DRA Simulation · Round 3

Brian이 리뷰어 역할로 질문합니다 — 오늘 주제(water depth · ground conditions)로. 소리로만 듣고 오늘·지난 표현으로 답하세요. 못 알아들으면 되묻기 (#21~25)도 정답!

1

"What is the water depth range at your Wando site?"

water depth / of the order of

2

"Could you describe the ground conditions at the site?"

ground conditions comprise / underlain by

3

"At what depth do you expect bedrock, and what type is it?"

bedrock / granitic in origin

4

"Are there any volcanic rocks near the seabed in your area?"

volcanic rock / near the seabed

5

"How does the water depth change as you move towards Jeju?"

as you go towards ~ / gets deeper

6

"Given these conditions, what foundation type are you considering?"

foundation selection / we're considering
