

DO ENGLISH WITH BRIAN

# Ho-jun — Class 5

*Answer Like an Engineer*

[Describe Your Site](#) · [DRA Round 3](#) · [3 Q&A Clips](#) · [DRA Round 4](#)

# Catching Up

가볍게 근황부터 — 그리고 지난 시간에 못 한 두 가지를 먼저 마무리합니다.

1

**How was your week? Any progress on the Wando project?**

완도 프로젝트 근황

2

**Last time we ran out of time — ready to describe your own site today?**

지난 시간 미완료분: 내 현장 브리핑 + DRA Round 3

3

**Then we'll watch three Q&A clips — this time, how they \*answer\*.**

오늘의 핵심: 질문받고 답하는 기술

# Now Describe Your Own Site

Class 4 표현으로 완도금일 프로젝트를 직접 설명해봅니다. 빈칸(~)은 호준님이 아는 실제 값을 넣어 말하세요.

## Summarize the video

*"The video looked at Korean water depths and ground conditions at four sites."*

## Water depth

*"In our Wando project, the water depth is of the order of ~ meters."*

## Ground conditions

*"The ground conditions comprise ~, underlain by ~. The bedrock is ~ in origin."*

## Connect to the video

*"The video's Site B is near our area — towards Jeju they mentioned volcanic rock."*

## Foundation

*"Considering the ground conditions, ~ looks most suitable for foundation selection."*

# DRA Simulation · Round 3

Brian이 리뷰어 역할로 질문합니다 — 지난 주제(water depth · ground conditions)로. 소리로만 듣고 답하세요. 못 알아들으면 되묻기도 정답!

1 “What is the water depth range at your Wando site?”

→ *water depth / of the order of*

2 “Could you describe the ground conditions at the site?”

→ *comprise / underlain by*

3 “At what depth do you expect bedrock, and what type is it?”

→ *bedrock / granitic in origin*

4 “Are there any volcanic rocks near the seabed in your area?”

→ *volcanic rock / near the seabed*

5 “Given these conditions, what foundation type are you considering?”

→ *foundation selection / monopile*

# Keeping the Pile Vertical

 clip1.mp4 1:25

## THE QUESTION

*"How are the horizontal and vertical stability adjusted — especially in a marine environment with swell? Is it all computer control, or a more old-fashioned approach?"*

① FIRST WATCH — 자막 OFF, 그냥 들어보기

② LEARN — 아래 표현·용어 확인

③ SECOND WATCH — 자막 ON, 다시 듣기

## EXPRESSIONS #31-33

**31** Is that for ~ or ~? [0:33]  
~에 대한 건가요, ~에 대한 건가요?

**32** Let's say, take ~ [0:33]  
예를 들어 ~를 보면

**33** If you imagine ~ [0:50]  
~를 떠올려보시면

## KEY TERMS #41-44

**41** swell [0:18]  
너울

**42** drive (a pile) [0:33]  
항타하다

**43** pile gripper [0:59]  
파일 그리퍼

**44** mechanical aids [1:17]  
기계적 보조 장치

# What's the Maximum Depth?

 clip2.mp4 1:00

## THE QUESTION

*“When it comes to drilling rock — what rock strengths can be drilled through, and what are the maximum depths available?”*

① FIRST WATCH — 자막 OFF, 그냥 들어보기

② LEARN — 아래 표현·용어 확인

③ SECOND WATCH — 자막 ON, 다시 듣기

## EXPRESSIONS #34–36

**34** **when it comes to ~** [0:00]  
~에 관해서라면

**35** **That's a challenging question to answer.** [0:04]  
답하기 쉽지 않은 질문이네요

**36** **It's always project-specific.** [0:48]  
프로젝트마다 다릅니다

## KEY TERMS #45–46

**45** **hard rock** [0:16]  
경암

**46** **jacket pile** [0:35]  
재킷 파일

# How Long Per Pile?

 clip3.mp4 2:00

## THE QUESTION

“What's the typical timeline for installing a monopile — hammering versus drilling?”

① FIRST WATCH — 자막 OFF, 그냥 들어보기

② LEARN — 아래 표현·용어 확인

③ SECOND WATCH — 자막 ON, 다시 듣기

## EXPRESSIONS #37-40

**37** in the range of ~ [0:11]  
~ 범위입니다

**38** It's all dependent on ~ [0:17]  
전적으로 ~에 달려 있습니다

**39** You're talking (about) ~ [0:31]  
대략 ~ 수준입니다

**40** I would say ~ [1:21]  
~라고 말씀드릴 수 있겠네요

## KEY TERMS #47-54

**47** drill-drive-drill-drive 드릴·항타 반복 공법 (DDD) [0:22]

**48** penetration 관입(깊이) [0:24]

**49** switch out ~ ~를 교체하다 [0:28]

**50** MPa megapascals (읽는 법) [0:41]

**51** gravelly clay 자갈질 점토 [1:00]

**52** hammer to depth 목표 심도까지 항타하다 [1:19]

**53** grouting 그라우팅 [1:47]

**54** m<sup>3</sup>/h meters cubed an hour (읽는 법) [1:52]

# DRA Simulation · Round 4

이번엔 오늘 배운 답변 골격으로 답하세요 — 쿠션(#34·35) → 조건(#36·38) → 수치(#37·39·40) 순서로.

1 “How long does installation take per pile at your Wando site?”

→ *in the range of / You're talking about*

2 “What's the maximum drilling depth you'd expect in granite?”

→ *That's a challenging question / It's always project-specific*

3 “Why monopile rather than a jacket foundation?”

→ *when it comes to / It's all dependent on*

4 “Could you explain how the pile stays vertical during driving?”

→ *If you imagine ~ / Let's say, take ~*

5 “What happens if you hit refusal before target depth?”

→ *switch out / drill-drive-drill-drive*

**Great work today, Ho-jun — 8월 화상회의, 이제 답변까지 준비됐습니다.**
